UFI-OUTDOORFURNITURE.COM

Universal Furniture Industries (UFI) is a synthetic wicker outdoor furniture manufacturer in Cirebon, Indonesia. After twelve years of being a division of synthetic wicker outdoor furniture at Indosurya Mahakam, UFI was officially established in 2001. UFI since then focuses on manufacturing Synthetic Wicker Outdoor furniture while Indosurya Mahakam continues manufacturing indoor furniture.

Cirebon city, where we are located, is acclaimed the world center of weaving. Hundred years of experience in creating various weaving techniques has earned the city international fame for weaving. To preserve the legacy, we feel compelled to always create more weaving techniques. And we can only do this with the assistance of local weaving technique experts that pass the knowledge to our skillful weavers.

Innovation. Comfort. Durability. Nature. These are what you will experience from each of our synthetic wicker outdoor furniture. Our spirit of innovation, beyond doubt, colors and excites the world-wide market of furniture. Our collaboration with our vendors on texture and color development has enabled us to create more natural rattan color and texture. Less plastic look. More natural look.

Innovation goes hand in hand with creativity and comfort. At UFI, we treat each production seriously and creatively at the same time. We listen carefully and professionally to our customers' inputs because producing synthetic wicker outdoor furniture is, for us, about catering customer's needs and about life style. Our brew of creativity and comfort will only leave you happy and contended for many years to come.

To the brew of creativity and comfort, we generously add durability so you can place our outdoor furniture in the open space for the whole 365 days with no worries. All synthetic weaving materials used to produce our furniture have to pass outdoor durability test and the international standard of UV test. Our weaving material vendors, Hularo Indonesia, have been strictly selected as we only work in partnership with vendors whose commitment to durability, color consistency and on time delivery is unquestioned.

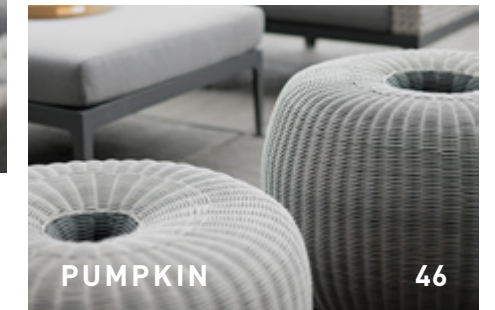

So far, UFI has been using a wide range of framing materials; Powder coated aluminum, stainless steel and the list goes on as we keep innovating with new materials aiming to produce only the finest synthetic wicker outdoor furniture for our world-wide customers.

Nature. It is our company policy to always use toxic-free and lead-free materials. Our powder coating line, for instance, uses toxic-and-lead-free material right from pre-treatment process until powder coating process. Our concern for nature does not stop here. Our Water Treatment Plan neutralizes the waste so we can dispose the waste without causing any harm to Mother Nature. Still in the spirit of green living, we turn some space of ours into green for air circulation and a better environment to live in.

To present only the best to our customers, we make a substantial investment in our R&D department, "Sinatra Design Centre". Occupying a 15,500 square foot building, this creative department has continuously and abundantly generated product innovation on framing, synthetic rattan fiber colors and textures, weaving techniques, design, comfortability, and durability in order to create products that meet the needs and wants of our world-wide customers. And to support the development of our upcoming products, UFI will soon have more new facilities set in the premises.

To date, UFI has collaborated with business partners from Europe, Middle East, and Australia, supporting their strong international brands by specifically designing creations for each country. Our synergy has boosted the sales volume, even during the global crisis. Thanks to solid cooperation and mutual trust with our partners, UFI has expanded from 160 thousand square foot land and 110 thousand square foot building to 765 thousand square foot land and 430 thousand square foot building. With 6,000 competent employees, our production capacity now reaches 1,200 containers per year. This production capacity is currently being multiplied as we plan to establish more partnerships with more countries across the world.
